Bhat(Dab249)

This Document will help to run and execute the program.

- We have attached the code in the .RMD file and the various .csv files are provided in the zip file.
- In the code, you need to change the location from where the .csv files are read to the location where you have downloaded and extracted the zip files.
- The above steps need to be done rented bikes datasets, station dataset, weather dataset, map dataset.
- Once this is done, you can run the program.
